INDIVIDUAL RISK VERSUS IMMEDIATE REPRODUCTIVE SUCCESS: A BASIS FOR LATITUDINAL DIFFERENCES IN THE ADRENOCORTICAL RESPONSE TO STRESS IN YELLOW WARBLERS (*DENDROICA PETECHIA*)

Department of Biology, University of Mississippi, University, Mississippi 38677, USA

Because of an editorial error, the results of several correlation analyses were reported incorrectly on pages 1241 and 1243–1244 in Wilson and Holberton (*Auk* 121:1238–1249). In each case in which the results of a correlation analysis were reported, the second *r*-value

given should have been identified as the critical value for the analysis. In addition, each correlation analysis should have been identified as a two-tailed test, using an alpha value of 0.05 and the sample size for the appropriate group (values reported elsewhere in the manuscript).
