BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

Frederick D. Bennett's scientific publications and reports

J. H. Frank[1,*]

Abstract

The titles and publication details of 270 scientific publications and reports by Fred D. Bennett are here assembled in approximately chronological order. They began in 1951 and ended in 2012. Fred is known worldwide as a specialist in biological control, a former director of the Commonwealth Institute of Biological Control, and in 1986 to 1993 a Graduate Research Professor of the University of Florida.

Key Words: entomology; botany; biocontrol of pests and weeds

Resumen

Los títulos y los detalles de la publicación de 270 publicaciones científicas e informes de Fred D. Bennett están aquí reunidos en orden cronológico aproximado comienzan en 1951 y terminan en 2012. Fred es conocido en todo el mundo como un especialista en control biológico, ex director del Commonwealth Institute of Biological Control, y en 1986 para 1993, profesor de investigación de posgrado de la Universidad de Florida.

Palabras Clave: entomología; botánica; control biológico de plagas y plantas malezas

The bibliography below was assembled using partial lists from Fred Bennett himself, Matthew Cock (CABI-IIBC), and Fred Legner (UCal Riverside).
