BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

Letter from the Editor

Welcome to this new issue of *Edentata*, the Newsletter of the IUCN/SSC Anteater, Sloth and Armadillo Specialist Group! Our Newsletter is steadily growing; this issue includes 15 interesting articles on such diverse topics as the reproductive behavior of anteaters, distribution of armadillos, or the ecology of sloths.

As announced in *Edentata* 8–10, our Newsletter is about to receive a major facelift. We have prepared **new Instructions to Authors** in English, Spanish and Portuguese. They are available at the end of this issue and can also be downloaded from our website. We kindly ask you to follow them when preparing your manuscripts and short communications for submission to *Edentata*.

We have recently concluded the re-assessment of all xenarthrans for the **IUCN Red List of Threatened Species**. Many thanks to all researchers who have contributed information on the geographic range, population size and status, habitat and ecology, threats, and existing conservation measures of their study species! We are currently working on a special edition of *Edentata*, in which we will present the results of the 2009/2010 assessment. So, please stay tuned for *Edentata* 11(2)!

As always, we are looking forward to receiving your articles, thesis abstracts, notes from the field, news items, and any other information related to the conservation of xenarthrans that you would like to publish in *Edentata* or our website <www.xenarthrans.org>.

Enjoy this new issue of *Edentata*!

A handwritten signature in blue ink, appearing to read 'M. Superina', with a long, flowing horizontal line extending to the right.

Mariella Superina, Editor in Chief
