BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

INTERNATIONAL JOURNAL OF BIOLOGICAL SCIENCES
– ANNOUNCEMENT AND CALL FOR PAPERS

The *International Journal of Biological Sciences* is an open-access general biological journal which publishes peer-reviewed scientific papers in all areas of the biological sciences. Types of articles include regular research papers, reviews, short research communications, viewpoints and commentaries. In addition to the mainstream areas of biology, the *Journal* encourages articles from emerging fields or cross-disciplinary with mathematics, physics, chemistry, engineering, and computer science. The *Journal* will publish special issues that focus on topics of common interest from time to time.

The *Journal* aims at rapid publication of high-quality research results while maintaining a rigorous peer-review process. The *Journal* is committed to open access to its online version in order to maximize the distribution of articles. Full texts of published articles appear in PubMed Central, the U.S. National Institutes of Health (NIH) digital archive of biomedical journal literature, and abstracts are indexed in PubMed.

Prospective authors should use the *Journal's* online submission system to facilitate rapid review and turnaround time. Only PDF or Word files will be accepted. The entire manuscript must be submitted as a single PDF or Word file. Figures and tables should be embedded in the PDF or Word file of the manuscript where they will appear, and not separated as individual files. Submission implies that the work is not previously published or under consideration for publication elsewhere, that the manuscript has been approved by all co-authors, and that the authors agree to all terms of the copyright and publishing agreement of the *Journal*. The manuscript's first page should include the title of the article, the author's name(s), affiliation(s) with complete addresses, corresponding author's email address, phone/fax number, an abstract of not more than 250 words, and a set of up to 6 keywords after the abstract. The author may suggest two to three potential referees who work in a closely related area and who can make expert evaluation of the manuscript. Detailed information may be found at <<http://www.biolsci.org>>.
