## CORRECTION . . .

### Correction on terminology

An error occurred in the paper entitled "Metastatic carcinoma of probable transitional cell origin in 66 free-living California sea lions (*Zalophus californianus*), 1979 to 1994" by Gulland et al., in the April issue of the Journal of Wildlife Diseases (Volume 32). In the last sentence on page 253, the word "cytokine" should be replaced by the word "cytoskeletal." The sentence should read as follows: Immunohistochemical studies using a panel of cytoskeletal stains confirmed the neoplastic cells as epithelial in origin.

Dr. John G. Trupkiewicz, Department of Veterinary Pathology, 2045 Haring Hall, University of California, Davis, CA, 95616, USA.

## SUSTAINING ASSOCIATE MEMBERS . . .

The *Wildlife Disease Association* is pleased to recognize the following organizations for their assistance in the publication of the *Journal of Wildlife Diseases.* The *Association* gratefully acknowledges their contribution and support in promoting the dissemination of information on the recognition, impact, prevention and control of diseases in wildlife and fish populations.
