BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

ANNOUNCEMENTS

Second International Conference on Wildlife Disease

The Wildlife Disease Association announces their Second International Conference on Wildlife Disease to be held at the University of Sussex, England, on July 18th to 22nd, 1971.

Programme

The official programme will begin on Sunday, July 18th at 7:30 p.m. with Welcome addresses by the President and by representatives of the Nature Conservancy, Game Conservancy, Wildfowl Trust and British Deer Society. Registration will proceed during Sunday afternoon. The Conference will terminate on the morning of the 22nd July.

Topics

Microbiological Problems; Pathology; Ecto and Endoparasites; Veterinary preventive medicine and public health; Stress and Disturbed Habitat; Pollution and the Environment.

The Chairmen of the different sections will be eminent men from the Medical, Wildlife Disease, and Veterinary Professions.

Book Review

Bibliotheca Microbiologica. Editor: Grumbach, A.

No. 9: **OLITZKI, A.: IMMUNOLOGICAL METHODS IN BRUCELLOSIS RESEARCH. PART II: IN VIVO PROCEDURES**

X + 299 p., 13 fig., 71 tab., SFr. 88.50 / US \$21.25 / DM 88.50 / 177 s.
S. KARGER AG BASEL / MUENCHEN / PARIS / NEW YORK, 1970.

The publication presents a broad literature review of research conducted to develop *in vivo* testing procedures. It is our feeling that some of the research accomplishments reviewed were of excellent quality whereas others presented little work of value.

The author has summarized but made no attempt to evaluate the research. Therefore to properly evaluate this publication and its significance readers must either be well experienced in the field of Brucellosis or else examine each author's work that has been surveyed.

Each chapter has a long list of references which are of value to researchers in Brucellosis immunology.

M. E. Macheak
