BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

Frontispiece: Sites along the Texas and Louisiana Gulf Coast, USA and in Saskatchewan, Canada, provide important staging habitat for Sanderling (*Calidris alba*). This picture shows a Sanderling that was banded and radio-tagged in Bolivar Flats, Texas, on 25 April 2016, and was resighted in the same location on 6 May 2017. Photo by Kristin Bianchini.

A big Thank-You to Stephanie Jones who stepped in to get this double issue over the finish line. This is the first step in getting *Waterbirds* back on schedule and the remaining issues caught up. Thanks, Steph, for your continual support of the Waterbird Society!
