BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

Appendix 3/Annexe 3

List of invertebrate species

Liste des espèces d'invertébrées

Caroline Vieux

Where two transects were sampled on one site: s = shallow for depth of 2–3 m and d = deep for depth of 10 m.

Lorsque deux transects ont été échantillonnés sur un même site : s = peu profond pour une profondeur de 2–3 m et d = profond pour une profondeur de 10 m.

Annex 3.a. Sea cucumber and mollusks species observed by site number along transect.

Annexe 3.a. Espèces de concombres de mer et de mollusques observées par numéro de site le long d'un transect.

Species / Espèces	Sites
Sea Cucumbers / Concombres De Mer	
<i>Actinopyga mauritiana</i>	Information not available / Information non disponible
<i>Actinopyga palauensis</i>	42, 69, 83d, 84
<i>Bobadschia argus</i>	Information not available / Information non disponible
<i>Bobadschia vitiensis</i>	Information not available / Information non disponible
<i>Holothuria atra</i>	33, 34, 45, 51s, 51d, 56, 73, 79
<i>Holothuria edulis</i>	34, 42, 43, 48d, 51d, 52d, 52s, 85d
<i>Holothuria coluber</i>	34, 43
<i>Holothuria fuscopunctata</i>	Information not available / Information non disponible
<i>Holothuria nobilis</i>	Information not available / Information non disponible
<i>Pearsonothuria graffeii</i>	79, 83d
<i>Stichopus chloronotus</i>	Information not available / Information non disponible
<i>Stichopus hermanni</i>	Information not available / Information non disponible
<i>Thelenota ananas</i>	Information not available / Information non disponible
Molluscs / Mollusques	
<i>Tridacna crocea</i>	29, 30, 31, 32, 33, 48s, 51s, 52s, 56, 57, 73, 86, 87s
<i>Tridacna maxima</i>	Information not available / Information non disponible
<i>Tridacna squamosa</i>	Information not available / Information non disponible
<i>Trochus niloticus</i>	Information not available / Information non disponible

d = deep with depth of 10m

s = shallow with depth of 2–3m

Annex 3.b. Size of sea cucumbers required for collection according to Province Nord regulations.

Annexe 3.b. Taille minimale pour la collecte des concombres de mer selon la réglementation de la province Nord.

Species / Espèces	Live size (cm) / Taille de l'animal vivant (cm)
<i>Actinopyga mauritiana</i>	25
<i>Actinopyga miliaris</i>	25
<i>Holothuria fuscogilva</i>	35
<i>Holothuria nobilis</i>	30
<i>Holothuria scabra</i>	20
<i>Holothuria scabra versicolor</i>	30
<i>Stichopus hermanni</i>	35
<i>Thelenota ananas</i>	45

Annex 3.c. Other invertebrate species of interest observed by site number along transects.

Annexe 3.b. Autres espèces d'invertébrés intéressantes observées par numéro de site le long de transects.

Species / Espèces	SITES
<i>Lambis truncata</i> (Mollusk)	43, 73, 52s
<i>Turbo setosus</i> (Mollusk)	42, 80, 83s, 73
<i>Diadema</i> sp. (Urchin)	29, 85s, 86, 87s, 87d
<i>Pinctada margaritifera</i> (Mollusk)	86s, 74, 84
<i>Acanthaster planci</i> (Starfish)	79, 83s, 48d
<i>Cypraea tigris</i> (Mollusk)	49, 48s, 51d
