

Index of important subjects and taxa

- abundance, definition 304, 318
- Acanthocephala 116–21, 280, 281, 283, 296, 301, 367, 368–69, 413, 415, 416, 422, 424, 425
- Acari 216–22, 336–37, 413–14
- accumulation indicators 424
- adaptations 3–6 *see also* coadaptation
 - asexual reproduction 6
 - in Ciliophora 38–41
 - complexity 3
 - to decreased salinity 299–300
 - dispersal 5
 - hermaphroditism 5
 - host and site specificity 6, 282
 - in larval trematodes 321
 - mechanisms of infection 5
 - parthenogenesis 5
 - in Porifera 176–177
 - reproductive capacity 3
 - size 3, 9
- age of host 286, 292
- aggregation, interspecific vs.
 - intraspecific 306–7, 315
 - index of aggregation 304
- allopatric speciation 335, 337, 338, 339, 341
 - definition 329
- alternative life cycles 302
- American lobster *see* lobster
- amoebae *see* Sarcodina
- amoebic gill disease (AGD) 19, 379, 382, 383, 388
- Amphilinidea 87–9, 92, 281
- Amphipoda 165–69, 281, 282
- Amyloodinium* 12, 13, 19, 381, 385, 386
- Angiostrongylus* 115, 402, 442–46
- anisakiasis 430, 432–34
- Anisakis* 5, 107, 113, 115, 355, 411, 416, 417, 432, 433
- antinedted *see* nestedness
- Apicomplexa 12, 13, 15, 26–9, 408, 435–36
- Arctic Refugium Hypothesis 336
- Ascothoracica 149–54, 173
- Aspidogastrea 4, 72–6, 281
- Aspidontus* *see* cleaner mimics
- associations, negative and positive 313, 318, 323
- Austroilharzia* 369, 440, 441, 442
- autapomorphies 341–42, 343
- balance in nature *see* nonequilibrium
- barnacles 2, *see also* Rhizocephala and Thoracica
- barriers, geographic 355, 356–57
- behaviour change of hosts 259–64
- benefits and costs of cleaning 269–70, 272
- bioerosion 175–77
- biological control
 - by cleaners 277
 - of introduced pests by parasites 364–651
- biological tags, parasites as 351–55
 - advantages 353–54
 - selection criteria 352–53
- biovolume/diversity relationship 317
- birds *see* sea birds
- bivalves *see* Mollusca
- Bonamia* 24, 25, 35, 360, 361, 387, 391, 392, 393, 394, 397, 398
- Bonellia* 246–48
- brackish water, parasites in 298–30 2
- Branchiura 145–47, 281
