PULSES—WINTER

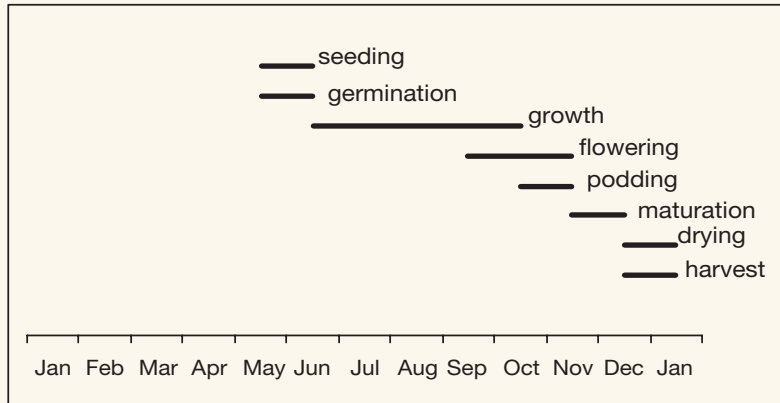

M.M. Miles, G.J. Baker and W. Hawthorne

(a) Lupins (Pulse Australia: W. Hawthorne)

(b) Field peas at late flowering, early podding (Pulse Australia: W. Hawthorne)

The winter pulse season in Australia: generalised phenology of winter pulse crops grown in temperate southern Australia. In warmer growing areas of northern WA (including the Ord River Irrigation area), Eyre Peninsula of SA and central Qld, flowering (July–September 50% flowering) and harvest may be earlier than indicated. In the Ord Irrigation Area the crop is harvested during September–October.
