

Acknowledgments

Many people made significant contributions to this textbook. We thank the authors for their efforts in the preparation of their chapters and for their tolerance during the editing process. Your patience, dedication and attention to detail were remarkable and without you this text would not have been possible. We also thank the many veterinarians, researchers and wildlife carers who were approached for information.

We would like to thank our families for putting up with us during the writing and editing of the book, particularly the many lost weekends and nights over the three or so years it took to complete. To Linda, Dan and Rianne (Vogelnest): thank you for your support, patience and tolerance. To the long suffering Evelyn,

Kaelie and Jade (Woods): thank you again and hopefully we can start to spend some more time together.

Thank you to Vanessa DiGiglio for assistance with preparation of manuscripts, to Jane Hall for assistance with providing information from the Australian Registry of Wildlife Health to authors, to Beth Croce for the brilliant illustrations and to Kaye Humphreys and the nurses and keepers at the Taronga Wildlife Hospital for assistance with the provision of information and photography.

We thank the Taronga Conservation Society Australia and the Australian Wildlife Health Network for their support, and CSIRO Publishing, John Manger and Briana Elwood for their guidance and patience.
