

## Acknowledgments

Sharron Skevington inked most of the drawings, and Angela and Richard Skevington contributed by mapping data. Marc De Meyer suggested New World *Pipunculus* as a suitable pipunculid taxon for revision. Thanks also go to R. Cannings, J. Cumming, K.G.A. Hamilton, B. Sinclair, I. Smith, J. R. Vockeroth, T. Wheeler, and D. M. Wood for their help. Special thanks go to J. Cumming and B. Sinclair for their help in deciphering pipunculid genitalia. Notes in *Methods* on use of lactic acid are produced with help from Dr. Cumming's unpublished notes on lactic acid as an agent for macerating Diptera specimens. This revision could be completed only with cooperation from the curators and museums listed in *Materials*. Thanks for their prompt and patient assistance. Support for the project was provided by an Ontario Graduate Scholarship to J.S. and Natural Sciences and Engineering Research Council Grant No. 852-36 to S.A.M.
