The BioOne Digital Library (<https://bioone.org/>) provides worldwide distribution for more than 580 journals and eBooks from BioOne's community of over 150 nonprofit societies, research institutions, and university presses in the biological, ecological, and environmental sciences. The BioOne Digital Library encompasses the flagship aggregation BioOne Complete (<https://bioone.org/subscribe>), the BioOne Complete Archive (<https://bioone.org/archive>), and the BioOne eBooks program offerings ESA eBook Collection (<https://bioone.org/esa-ebooks>) and CSIRO Publishing BioSelect Collection (<https://bioone.org/csiro-ebooks>).

Your use of this PDF, the BioOne Digital Library, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Digital Library content is strictly limited to personal, educational, and non-commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne is an innovative nonprofit that sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

Mizutani (1970) introduced a new name, *Lejeunea micholitzii* Mizut., when transferring *Hygrolejeunea parvisaccata* Steph. to *Lejeunea* Lib. since *Lejeunea parvisaccata* (Steph.) Steph. was blocking the name in *Lejeunea*.

The two taxa were treated as synonyms in Söderström et al. (2016) following Grolle and Piippo (1984, note 162). However, this interpretation is an error, misled by a typographical error in the note. *Lejeunea parvisaccata* is thus re-instated here. Although it is similar in morphology to *Lejeunea sordida* (Nees) Nees and *Lejeunea micholitzii*, it can be recognized by the combination of several morphological characters such as underleaf and leaf apex. Owing to the lack of molecular DNA data, the exact status of this taxon is not clear, but at present it is best to treat it as a separate species.
