The BioOne Digital Library (<https://bioone.org/>) provides worldwide distribution for more than 580 journals and eBooks from BioOne's community of over 150 nonprofit societies, research institutions, and university presses in the biological, ecological, and environmental sciences. The BioOne Digital Library encompasses the flagship aggregation BioOne Complete (<https://bioone.org/subscribe>), the BioOne Complete Archive (<https://bioone.org/archive>), and the BioOne eBooks program offerings ESA eBook Collection (<https://bioone.org/esa-ebooks>) and CSIRO Publishing BioSelect Collection (<https://bioone.org/csiro-ebooks>).

Your use of this PDF, the BioOne Digital Library, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at [www.bioone.org/terms-of-use](http://www.bioone.org/terms-of-use).

Usage of BioOne Digital Library content is strictly limited to personal, educational, and non-commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

---

BioOne is an innovative nonprofit that sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

### **Letter to the Editor**

#### **Tissue Bank**

Sir:

In 1966, The St. Louis Zoological Park received support for the establishment of a Tissue Bank to make available to bio-medical researchers and educators tissues from exotic fauna that have died in the collection at The St. Louis Zoo. It is felt that The Tissue Bank is a valuable contribution to the scientific community as well as a service to the conservation of wildlife. It enables researchers to obtain tissues from exotic fauna that otherwise would not have been available to them. It conserves the rare and endangered wildlife that would have been sacrificed had these tissues not been provided.

The Tissue Bank has been reorganized during the past year and we now have over 1,500 specimens representing almost every order of Mammals, Birds, Reptiles and Amphibians. We are making these tissues available at a nominal cost on a weight basis with a graduated scale to cover the cost of handling, catalogs, reagents, etc.

We have recently comprised a 52 page catalog listing available tissues. For copies of the catalog or any other information please contact me.

William J. Boever, D.V.M.,  
St. Louis Zoological Park  
St. Louis, Missouri 63110, U.S.A.
