### **Notice of Withdrawal**

This paper (originally published as 12.141) described the root borer, *Acanthophorus rugiceps* Gahan (Coleoptera: Cerambycidae), as a new record on physic nut, *Jatropha curcas* L. (Malpighiales: Euphorbiaceae), in India. The species involved has since been identified as *Acanthophorus serraticornis* (Olivier) by Dr. Alain Drumont (Entomology Department, Institut Royal des Sciences naturelles de Belgique, Bruxelles Belgium), which is known to be present in India. The original paper has therefore been withdrawn.
