The BioOne Digital Library (<https://bioone.org/>) provides worldwide distribution for more than 580 journals and eBooks from BioOne's community of over 150 nonprofit societies, research institutions, and university presses in the biological, ecological, and environmental sciences. The BioOne Digital Library encompasses the flagship aggregation BioOne Complete (<https://bioone.org/subscribe>), the BioOne Complete Archive (<https://bioone.org/archive>), and the BioOne eBooks program offerings ESA eBook Collection (<https://bioone.org/esa-ebooks>) and CSIRO Publishing BioSelect Collection (<https://bioone.org/csiro-ebooks>).

---

BioOne is an innovative nonprofit that sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common

ARTICLES

339 From the Editorial Board

RESEARCH ARTICLES

- 341 Wilton Ricardo Sala-Carvalho, Denilson Fernandes Peralta and Claudia Maria Furlan  
A chemistry overview of the beautiful miniature forest known as mosses
- 360 André Aptroot, Lidiane Alves dos Santos, Carlos Augusto Vidigal Fraga Junior and  
Marcela Eugenia da Silva Cáceres  
*Ramalea* and the new genus *Appressodiscus* belong in the Ramalinaceae
- 367 Amanda Hardman, Michael Russell, Daphne Stone, Erica Heinlen, John Villella and Kathryn Beck  
Calicioid presence in relation to substrate and tree age in forests of northeast Washington, U.S.A.
- 379 Scott LaGreca  
Chicita Francis Culberson (1931–2023)
- 385 Ann Stoneburner and Robert Wyatt  
New and confirmed chromosome counts for the Mniaceae

RECENT LITERATURE

- 398 John J. Atwood, William R. Buck and John C. Brinda  
Recent literature on bryophytes—126(3)
- 417 James C. Lendemer  
Recent literature on lichens—270

THE BRYOLOGIST | 126(3): 339–425 | FALL 2023

A Journal of Bryology and Lichenology  
THE BRYOLOGIST

(ISSN 0007-2745)

VOLUME 126  
NUMBER 3  
FALL 2023

#### GENERAL INFORMATION

THE BRYOLOGIST publishes research papers and reviews dealing with all aspects of bryology and lichenology. All manuscripts are reviewed by two or more referees before acceptance. Deadlines for the four issues are the 15th of February, May, August, and November. Manuscripts should be submitted electronically to The Bryologist online at <http://www.editorialmanager.com/bryologist/>. Instructions to authors and editor contact information is available at [ABLS.org](http://ABLS.org) and at [PeerTrack/bryologist](http://PeerTrack/bryologist). Email contact for the journal is: [bryologist@peertrack.net](mailto:bryologist@peertrack.net)

THE BRYOLOGIST (ISSN 0007-2745), a journal devoted to the study of bryophytes and lichens, is published quarterly by The American Bryological and Lichenological Society, Inc. Renew subscription and membership online at: <http://abls.allenpress.com/> ABLs. Annual dues for membership in the Society are US\$25 (\$10 for students; \$35 for families; \$1000 for lifetime). The 2019 cost for individuals to receive THE BRYOLOGIST is an additional \$45 (online only) or \$60 (hard copy and online), and to receive *Evansia* an additional \$15 (online only) or \$25 (hard copy and online). Members with non-U.S.A. & non-Canada addresses must pay an additional amount for mailing costs: \$25 per year for THE BRYOLOGIST and \$10 per year for *Evansia*. U.S.A. institutions may subscribe to THE BRYOLOGIST hard copy for \$160 per volume (\$190 for all other institutions). The cost for *Evansia* hard copy for U.S.A. institutions is \$70 (\$80 for all other institutions). Airmail delivery can be arranged for an additional fee; contact the ABLs Membership Services Office <http://abls.allenpress.com/> ABLs. Contact the Secretary with any other questions: Diane Haughland, Alberta Biodiversity Monitoring Institute, Royal Alberta Museum 9810 103a Ave NW, Edmonton, AB, T5J 0G2 Canada. E-mail: [diane.haughland@gov.ab.ca](mailto:diane.haughland@gov.ab.ca)

POSTMASTER: send address changes to ABLs Member Services, Allen Press, P.O. Box 7065, Lawrence, KS 66044.

The Bryologist and ABLs website is at <http://www.abls.org>

**Cover illustration:** *Rhizomnium glabrescens* is a small but distinctive moss common in coastal forests on rotten logs, humus, or soil over rocks. It is endemic to the Pacific Northwest, ranging from northern California to the Aleutian Islands of Alaska, typically at low elevations near the coast. Recently, genetic evidence has shown this species to have high levels of genetic variation and to be highly distinct from the other North American species of *Rhizomnium* (Wyatt et al. 2023). In the current issue, Stoneburner & Wyatt, page 385, confirm a chromosome number of  $n = 6$  for this species.
