BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

ERRATA

Inoda T, Tajima F, Taniguchi H, Saeki M, Numakura K, Hasegawa M and Kamimura S (November, 2007) Temperature-dependent regulation of reproduction in the diving beetle *Dytiscus sharpi* (Coleoptera: Dytiscidae). Zoological Science 24 (11): 1115–1121.

A sentence in Discussion inappropriately reported the results of a previous study. Therefore, the authors would like to make the following corrections:

Discussion, page 1121, lines 1–5, left column:

Sexually dimorphic regulation is different from the results shown by Pener and Orshan (1983), who reported that the mechanism regulating diapause usually works simultaneously for both males and females, synchronizing their reproductive activities.

Correction: Delete the sentence.

References, page 1121, lines 27–30, right column:

Pener MP, Orshan L (1983) The reversibility and flexibility of the reproductive diapause in males of a "short day" grasshopper, *Oedipoda miniata*. In "Diapause and Life Cycle Strategies in Insects" Ed by VK Brown, I Hodek, Junk, The Hague, pp 67–85

Correction: Delete the reference.

The authors thank Dr. M. P. Pener for calling this error to their attention.
