BioOne Complete ([complete.BioOne.org](https://complete.BioOne.org)) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at [www.bioone.org/terms-of-use](http://www.bioone.org/terms-of-use).

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

---

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

## Changes in manuscript submission

The website of *Acta Palaeontologica Polonica* is undergoing major changes to improve your online experience in submitting/resubmitting your work and in retrieving archival papers published in the journal. Our new submission system installed as of June 2008 is available at <http://www.app.pan.pl/esubmission.html>. It is no longer necessary to submit a hard copy in addition to an electronic upload, although it is still possible to mail it with accompanying CD-R containing all relevant electronic files.

Using the online system is straightforward and includes two steps. In the first step, the corresponding author needs to enter names e-mail addresses for all authors and create a password. The following information is then entered in separate fields: manuscripts title, abstract and 6 to 8 key words identifying the nature of the subject matter, and names/e-mail addresses of five potential reviewers (the copy-and-paste method may be used for entering information). After clicking "Submit to APP" button, the activation wizard will generate an e-mail message to the corresponding author

with the manuscript number. In the second step, the corresponding author needs to login to the APP Submission system using the manuscript number and the password assigned earlier. Next, by browsing a local directory, the manuscript files can be selected and uploaded. The following documents should be submitted: (1) text file of your manuscript in Word format, (2) document in PDF format that contains all figures and tables etc., and (3) cover letter (Word format) that starts with a concise statement of the authors' view of the importance and uniqueness of the paper.

We encourage authors to submit animations, movie files, sound files or any additional information for online publication. Explanation and links to multimedia files should be provided in a Word or PDF document "Supporting Online Material" (to download SOM template file please visit the following this site: [http://www.app.pan.pl/styles/appXX-TEMPLATE\\_SOM.doc](http://www.app.pan.pl/styles/appXX-TEMPLATE_SOM.doc)).

Please see the individual journal's Instruction to Authors for more detailed instructions on journal and reference style.
