The BioOne Digital Library (<https://bioone.org/>) provides worldwide distribution for more than 580 journals and eBooks from BioOne's community of over 150 nonprofit societies, research institutions, and university presses in the biological, ecological, and environmental sciences. The BioOne Digital Library encompasses the flagship aggregation BioOne Complete (<https://bioone.org/subscribe>), the BioOne Complete Archive (<https://bioone.org/archive>), and the BioOne eBooks program offerings ESA eBook Collection (<https://bioone.org/esa-ebooks>) and CSIRO Publishing BioSelect Collection (<https://bioone.org/csiro-ebooks>).

Your use of this PDF, the BioOne Digital Library, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Digital Library content is strictly limited to personal, educational, and non-commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne is an innovative nonprofit that sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

Errata

ESTIMATING MIGRATORY CONNECTIVITY OF GRAY CATBIRDS (*DUMETELLA CAROLINENSIS*) USING GEOLOCATOR AND MARK–RECAPTURE DATA

THOMAS B. RYDER,^{1,3} JAMES W. FOX,² AND PETER P. MARRA¹

In our paper, we inadvertently left out the following acknowledgments. We are indebted to the staff of the USGS Bird Banding Lab for archiving, managing, and sharing data that enabled us to make large-scale geographic inferences about migratory connectivity for

the Gray Catbird (*Dumetella carolinensis*). In addition, we thank the thousands of banders that spent countless hours banding birds and scheduling their data, without whom this manuscript would not have been possible.
