BioOne is an innovative nonprofit that sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

## Addendum

KLICKA,<sup>1</sup> JOHNSON,<sup>2</sup> AND LANYON (2000)

*James Ford Bell Museum of Natural History, 100 Ecology Building, University of Minnesota,  
St. Paul, Minnesota 55108, USA*

In a recent contribution (Klicka et al. 2000), we presented an analysis of New World nine-primaried oscine relationships based on DNA sequences of mitochondrial cytochrome-*b* and

NADH dehydrogenase subunit 2 (ND2) genes. Those sequence data for the species we examined have now been deposited in Genbank and can be accessed using the following accession numbers: ND2: AF290100–AF290136 and cytochrome-*b*: AF290137–AF290176.
