BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

Erratum—Temporal and Spatial Dynamics of Ice-Covered Upper Dumbell Lake (Ellesmere Island, Arctic Canada) during the Summer of 1959

Spencer Apollonio* and
Jasmine E. Saros†

Table 1 in the original paper (Apollonio and Saros, 2014) contained several errors in Table 1. The table and caption should be replaced with the following version. Where a place in the ta-

ble no longer contains a number, that number has been struck through. Several other numbers have been changed. All changes are in bold.

TABLE 1

Physical, chemical, and biological metrics of the water column of Upper Dumbell Lake over the summer of 1959. Temp = temperature; PAR = photosynthetically active radiation; DO = dissolved oxygen; Alk = alkalinity; Chloro = chlorophyll; SRP = soluble reactive phosphorus; dSi = dissolved silica.

Date	Depth (m)	Temp (°C)	PAR (μE m ⁻² s ⁻¹)	DO (mg L ⁻¹)	Alk (meq L ⁻¹)	pH	Chloro (μg L ⁻¹)	Nitrate (μg L ⁻¹)	SRP (μg L ⁻¹)	dSi (μg L ⁻¹)
