The BioOne Digital Library (<https://bioone.org/>) provides worldwide distribution for more than 580 journals and eBooks from BioOne's community of over 150 nonprofit societies, research institutions, and university presses in the biological, ecological, and environmental sciences. The BioOne Digital Library encompasses the flagship aggregation BioOne Complete (<https://bioone.org/subscribe>), the BioOne Complete Archive (<https://bioone.org/archive>), and the BioOne eBooks program offerings ESA eBook Collection (<https://bioone.org/esa-ebooks>) and CSIRO Publishing BioSelect Collection (<https://bioone.org/csiro-ebooks>).

Your use of this PDF, the BioOne Digital Library, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Digital Library content is strictly limited to personal, educational, and non-commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne is an innovative nonprofit that sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

FROM THE EDITOR

In the field with Merritt Lyndon Fernald

Lytton John Musselman

It has now been six months that I have had the honor of serving as Editor-in-Chief of *Rhodora*, the journal of the New England Botanical Society, so I would like to share some reflections on my relationship with the journal.

I am no stranger to this venerable botanical resource. In fact, one of my early papers was on the flora of the Great Dismal Swamp in Virginia and North Carolina, published in *Rhodora* half a century ago. Little did I know then that I would be tracking Merritt Lyndon Fernald's botanical activities as part of my research on the floristics and ecology of the region, reading his often entertaining accounts of collecting in the part of Virginia that became my botanical home. To frame it in Fernaldian biogeography, I work in the southeastern part of his botanical domain. His fastidious fieldwork, collections, and descriptions of plant communities published in our journal have been an invaluable resource for my research. My hope is that *Rhodora* continues this auspicious tradition for future botanists.

To do so, we need to make our journal better known to emerging generations of botanists. One way to do this is by promoting the journal and NEBS research awards through existing mailing lists and in other botanical society newsletters. I plan to work on this over the next few months and look forward to your suggestions for outreach—not only to academics but to the general botanical public as well. Please send your ideas and queries for submissions to editor@rhodora.org.

Plantfully,
Lytton John Musselman
Editor-in-Chief
