BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

CORRECTIONS

The October 2015 issue of the Natural Areas Journal included the article, “Disturbance, Succession, and Structural Development of an Upland Hardwood Forest on the Interior Low Plateau, Tennessee” by Justin L. Hart, Merrit M. Cowden, Scott J. Torreano, and J. Patrick R. Vestal (Vol 35, no. 4, pp. 557-573). A revised version of this article is available online at BioOne with the following corrections:

	Original	Revision
Page 557, author name	Patrick R. Vestal	J. Patrick R. Vestal
Page 558, second column	Permanent settlement of the area did not begin until 1785 when European settlers first built homesteads near Nashville.	Permanent European settlement of the area did not begin until 1785 when settlers first built homesteads near Nashville.
